1. The first step is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

2. The second step is to develop a plan or strategy to address the problem. This involves identifying the goals and objectives, and determining the resources and methods needed to achieve them.

3. The third step is to implement the plan and monitor progress. This involves putting the plan into action and regularly checking on the progress to ensure that the goals are being met.
